Forms	3 forms*	single dose only		multidose vials		multidose vials			multidose vials	multidose vials

1. **Gelatin:** Many reported cases of allergy and anaphylaxis. Additional vaccines with gelatin: Varivax (chickenpox), Zostavax (shingles), Polio, MMR and TriHibIt (DTaP + HiB).
2. **Formaldehyde:** The EPA and IARC have classified formaldehyde as a human carcinogen at any dose.
<http://www.cancer.gov/cancertopics/factsheet/Risk/formaldehyde>
3. **Polysorbate 80:** Numerous studies have shown this stabilizer can cause infertility:
4. **Thimerosal:** Used during manufacturing said to have <0.3mcg/dose. According to the FDA, the exact quantities in the vials have not been confirmed by independent testing. Multidose vials with thimerosal 24.5 to 25mcg/dose.
5. **Latex:** Natural rubber latex in vials has been associated with allergies and anaphylaxis.
6. **Afluria:**
 - a. **Pediatric 0.25 single dose, no thimerosal**
 - b. **Adults/pediatric 0.50 single dose, no thimerosal**
 - c. **Multidose vial, each dose has 24.5mcg of mercury**
